

A Peek into The Guest Cottage

I've had a few requests to share pictures of the guest cottage interior.

To read about the restoration of the guest cottage, you can visit my Terra Tour section of this website or click [here](#) for the Guest Cottage overview.

The guest cottage sits on the secluded and quiet northwest corner of our property.

The guest cottage is approximately 576 square feet. Below is the living room done in neutral tones with soft blue accents.

The peonies are from [The Enchanted Home](#). Sofa, loveseat and side chair are all upholstered in [Sumbrella](#) fabric.

The coffee table was a \$35 find at a 2nd hand store. All the

accent pillows are from [Pottery Barn](#).

The bedroom headboard is from an 1897 Victorian house I owned in Alameda, California. The previous owner left it in one of

the bedrooms and it has moved with me ever since. Lampshades and pillowcases are from Pottery Barn. The matelasse coverlet and sheets are from [J.C. Penney](#).

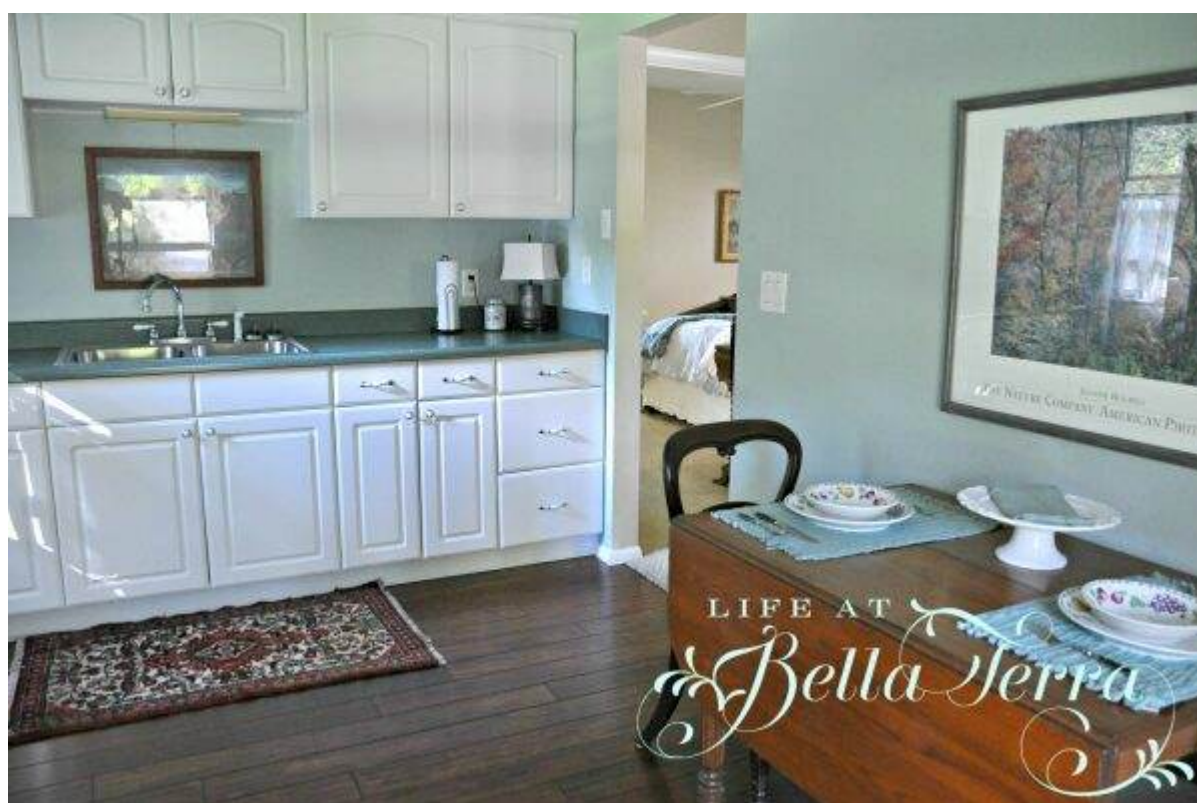

The full bathroom has a stackable washer/dryer and plenty of

storage. The mirror over the sink is from an old dresser and the wall lamps were added to the frame.

The kitchen is fully equipped with a gas stove, refrigerator, dishes, pots and pans and silverware.

The journey to the guest cottage is a bit magical as the walkway is through an arch of vines. Not only do our guests enjoy their privacy, but we do as well.

I hope you've enjoyed peeking into the guest cottage!

Mary
