

# Front Hall

The front hall has a beautiful original staircase, detailed with original trim and wainscoting. We refinished the original Canadian beech hardwood floors. We discovered a secret panel that drops down with a rope and pulley to expose the underside of the stairs and gives access to the powder room plumbing. We decided on a sisal runner for the stairs. The petticoat table is a rare find from an estate sale and the lamps are created from silver candlesticks.

The door to the right of the petticoat table is to the powder room. The door adjacent to the is to a hall closet.
